FUEL SURCHARGE
QLYC 100, QCDB 100, QWLA 100

FUEL SURCHARGE APPLICATION

The Fuel Index is issued by the DOE on Tuesday afternoon each week and will become effective the next day (Wednesday) and remain in effect through the following Tuesday. If Monday is a bank holiday then the fuel will be reported on Wednesday afternoon and will become effective that same day (Wednesday) and remain in effect through the following Tuesday.

A fuel surcharge shall be applied as a percentage, from the table below, to all line haul rates, minimums and any situation where a tractor movement rate applies i.e. Spotting, Re-delivery or Dead-head not associated with line haul etc. The fuel surcharge will be based on the fuel index on the pickup or initial tractor movement date.

The term "line haul" means the charge for over-the-road transportation of a given commodity or product exclusive of any accessorials; provided these charges are not embedded or rolled into the rate. Any accessorial or surcharge rolled into a line haul rate will then be considered a part of line haul and will be subject to the fuel surcharge application.

Fuel Surcharge application shall be based on the following geographic rules:

New England Diesel Fuel Index,
Reported weekly by the Department of Energy at **https://www.eia.gov/petroleum/gasdiesel/** should be used for shipments between the following States and Canadian Provinces: CT, DE, ME, MA, NH, NJ, NY, OH, PA, RI, VT, WV,ON and PQ. This index shall only be used when the origin and destination are within the above mentioned states.

West Coast Diesel Fuel Index,
Reported weekly by the Department of Energy at **https://www.eia.gov/petroleum/gasdiesel/**, should be used for shipments originating in CA,OR, AZ, NV, and WA. This index shall only apply to loads originating out of CA, OR, AZ, NV, or WA.

National Diesel Fuel Index,
Reported weekly by the Department of Energy at **https://www.eia.gov/petroleum/gasdiesel/**, should be used for shipments not governed by the New England and West Coast Diesel Fuel Indexes.

Geographic Application Examples

- Bridgeport, NJ to Montreal, PQ – Apply New England because both the origin and destination are within the New England scope.
- Bridgeport, NJ to Tampa, FL – Apply National because only one point is within the New England scope.
- Bridgeport, NJ to Richmond, CA – Apply National because only one point is governed by the New England and although CA is a point, it's not the origin.
- Richmond, CA to Bridgeport, NJ – Apply West Coast because shipment originates in CA.
- Tampa, FL to Houston, TX – Apply National because it falls outside of the New England and West Coast scope.
